

YOUR STEP-BY-STEP CHECKLIST WHEN DETERMINING YOUR DATA STORAGE REQUIREMENTS

BUSINESS

- 

1 Is this strategically important to the business?
- 

2 Is this to be deployed across multiple areas/divisions of the business?
- 

3 Is there a timeline that needs to be met?
- 

4 How does this solution need to cater for changes in the coming months and years?
- 

5 What does the business need from this solution in terms of availability?
- 

6 Plan your infrastructure modernization for three to five-year growth, not only existing needs.

FINANCIAL

- 

1 Is there a defined budget aligned to this requirement?
- 

2 Include in your investment the opportunity cost of data loss.
- 

3 Include in your investment the opportunity cost of service / business interruption.
- 

4 Are you considering buying versus renting (as a service) with regards to infrastructure?
- 

5 Are you costing in-house versus outsourced skilled resources?
